Autocomplete

The search bar which is present in the Index page is just for searching webpages. There is a "Search" tab in the navigation bar, which is the experimental page according to the assignment. where we tested the search functionality. The search bar in the experimental page only works for searching countries.

We have implemented the autofill in all our search forms

1. In the University search form type 1 or 2 and Germany or any other country which is in our database in the country field.
2. In the professor search form type, "a" in the university field and "a" as well in the country field.
3. In the student search form type IIT or URUS and Germany or USA in the country field.
4. In the Test form type character "T" in the country field.
